

ABSTRACT

A suspension system for curtains, drapes, blinds, swags, cornices, or other types of window treatment includes a mounting fixture which is for attachment to a window frame or a wall adjacent a window. The mounting fixture has one or more elongate cavities, each cavity having an open end and a closed end. The fixture is for mounting
5 cavities, each cavity having an open end and a closed end. The fixture is for mounting with the open end of the cavities upward. The system also includes one or more brackets, rods cornices, or other window treatment components, each component including a cavity engaging portion for insertion into one of the cavities of the fixture so that the component is supported on the closed end of the cavity.
